

# What did we want to acheive?

Goals

1 Create **consistency across** Scan and View Screens

2 Build a **scalable toolbar system**  
Support future tools without adding complexity.

3 Lower **cognitive load** in critical moments  
Help clinicians focus on the **patient and scan quality**.

KPI's

Average time  
to select a tool

Overall scan duration  
/ chair time

Misclick rate during  
live scanning
